

AmeriLux Transportation & Pioneer Metal Finishing form a Dedicated Partnership

AmeriLux Transportation and Pioneer Metal Finishing have agreed to a private fleet conversion. This will include a total of three sites in Green Bay, Wisconsin, Monroe, Michigan, and Chippewa Falls, Wisconsin to AmeriLux's dedicated fleet.

Pioneer, headquartered in Green Bay, Wisconsin, specializes in providing outsourced metal finishing services to manufacturers across North America. As a leading provider of Anodize, Plating, and Coating services, Pioneer supports a wide range of industries including automotive, industrial, medical, consumer goods, aerospace, defense and more.

This strategic partnership with AmeriLux Transportation will allow Pioneer to focus on its growth efforts while continuing to fulfill their commitment of high level of services and expanded and dynamic delivery capabilities.

According to AmeriLux Transportation & Logistics Vice President and General Manager Marc Leisgang, Pioneer Metal Finishing has been operating their own private fleet for over 20 years. The Amerilux team have been spending time at each Pioneer location, getting to know and welcoming the drivers to the A-Team.

"We are excited to partner with Pioneer," Marc said. "This private fleet conversion will become effective on March 1, 2025. Jacob Hebbard, Operations Manager with AmeriLux Transportation, will be leading the effort to ensure a smooth transition while exceeding customer expectations on service."

"We are excited to partner with AmeriLux to optimize our transportation services," said Paul Lund, Vice President of Commercial Operations at Pioneer Metal Finishing. "This partnership will not only support our growth but also enhance our delivery capabilities, further advancing our mission to streamline the metal finishing outsourcing experience by seamlessly connecting our customers' facilities with Pioneer."
